

ORGANIZATION

Visual timers/ 3in, 8 in, 12 in

Designed to help students understand, "how much longer," no other teaching aid reinforces the concept of elapsed time like the teacher-tested Time Timer. The disappearing red disk allows students to "see" time without knowing how to "tell" time. The Time Timer is perfect for setting time limits, managing transitions and training students to make better use of available time.

Time Timer Software

This software provides innovative new ways to visualize the passage of time by allowing the user to work with hours, minutes, and seconds in "real time." Application window can scale on your screen as well as float on top of other applications.

Teach Timer

TeachTimer Designed for the classroom teacher to use in timing tests, reading assignments, lab experiments or any other classroom event. Placed on any standard overhead projector, the TeachTimer projects in large numerals the amount of minutes/seconds remaining during a timed event. This encourages students to manage their time more efficiently. Timer can count down to or up from zero. Timing counts can be paused or repeated. Audible signal gives pre-warning before end of timing count. Battery-saver mode lets clock run with display turned off.

Study Carrels

Lightweight, portable, desktop carrel is ideal for testing or individual learning activities. Sturdy corrugated construction with woodgrain prints outside. Base provides hard writing surface. 25w x 18d x 17h.
