

# Panopreter

## **Text to Speech Software With Natural Voices**

Text to speech software enables you to have written text read out loud on a computer. Panopreter is an intuitive and easy to use **text to speech software** for Windows users. It reads any text aloud with natural voices, supports various file formats by reading the text you selected in any other software windows and copied to the Windows clipboard. Moreover, it converts the text to mp3, wav, ogg and flac audio files, thus you can listen to the audio files with a portable media player device later at your convenience.
