

SOLO

SOLO is a literacy suite of the most popular assistive technology accommodations, including a text reader, graphic organizer, talking word processor, and word prediction. The new version (SOLO 6) was completely redesigned to be simple to use, yet powerful for students who struggle to read and write. For these students, SOLO 6 places all of the right tools at their fingertips. The accommodations in SOLO put students in charge of their own learning.

Portable Word Processors and Tablets

A portable word processor is a lightweight device that is easy to transport (e.g., from classroom to home). It can be helpful to kids who may have trouble writing by hand and prefer to use a keyboard. Word processing allows the user to edit and correct his written work more efficiently than doing so by hand
